Why would you recommend/not recommend this course?				
<i>Different modality to incorporate in the practice.</i>				
<i>Need more practice.</i>				
<i>20% of info that gets 80% of the results. Instruction as to what does not work.</i>				
<i>B/c the practice time made me feel more confident.</i>				
<i>Informative.</i>				
<i>Cost effective for basic knowledge.</i>				
<i>Excellent overview and confidence for IVs.</i>				
<i>Highly recommended!</i>				
<i>Provides adequate resources and training to begin using oxidative therapies in practice.</i>				
<i>Clean, concise and material and procedures that can be used on Monday.</i>				
<i>Cost, location, expertise, and experience of instructor, materials used and variety of techniques all appreciated.</i>				
<i>It covers all important points and allows practice, even for NDs who <u>are</u> allowed to do direct IV ozone.</i>				
What would you change about this course?				
<i>Need more practice.</i>				
<i>The rain was a slight inconvenience, but overall was acceptable.</i>				
<i>Post videos online of each modality as review.</i>				
<i>Add practice management tips - more cost effective procedure ie. using saline bags for Malt rather than glass.</i>				
<i>Also quick reference chart for basic conditions it treats really well and duration of treatment.</i>				
<i>Do an H2O2 IV.</i>				
<i>Could have covered slides quicker.</i>				
<i>More of biochemistry and "why".</i>				
<i>Consent form. More on H2O2. Discussion on using nasal O3 insuff > flow through olive oil terpenes etc.</i>				
<i>Would like a chart for appropriate times and concentrations for ozone ie. acute respiratory infections nasal insuff @ 200 for 20 mins.</i>				
<i>I would love even just a demo of how rectal/vaginal insufflation would work and making H2O/oil infused with O3 as these are what I wish to most use in my practice.</i>
