Why would you recommend/not recommend this course?				
<i>Recommend. Very Comprehensive.</i>				
<i>Research based information with straight forward protocols to make chelation easy to integrate into my practice.</i>				
<i>Very thorough. Great clinical examples and information.</i>				
<i>It is a great knowledge to have anybody doing Ivs and specialty chelation.</i>				
<i>Chelation should be taught to every ND!</i>				
<i>Small group-good learning environment. Lots of practical Q&As. Charts are highly useful; Dr. Prytula is very experienced.</i>				
<i>Recommend. Different perspective on chelation.</i>				
<i>Excellent material.</i>				
<i>Great information. Really clear.</i>				
What would you change about this course?				
<i>A summary of facts to present to patients may be helpful in electronic format.</i>				
<i>Nothing.</i>				
<i>Nothing.</i>				
<i>It is good.</i>				
<i>More specific protocols and dosages. Writing on some power points are too small. More info on supportive nutrients, ie. brand and dosage.</i>				
<i>Include heavy metal testing and interpret slides in the booklet.</i>				
<i>More breaks please.</i>				
<i>Electronic copies would be better - 6 slide/page is too small at my age :)</i>				
<i>Please, less reading slides with sooo much info on them, and more summaries/bottom line. More protocol discussion and patient troubleshooting would be beneficial</i>
