Why would you recommend/not recommend this course?			
<i>Dr. Prytula is very candid, knowledgeable, and passionate. This combined with the clinically relevant info that can be applied immediately makes this course excellent.</i>			
<i>For me, I can't do the IV's but the use of ozone will be beneficial the way I can use it.</i>			
<i>There is not a lot of info about ozone therapies so I would recommend it to feel more confident in using it in practice.</i>			
<i>Is a great certification course but would also be great as a refresher course as well.</i>			
<i>Great knowledge base, thorough understanding of therapy and technique as well as time to practice the technique.</i>			
<i>Definitely those who are comfortable doing Ivs.</i>			
<i>Amazing type of treatment that seems easy to add to your IV practice. Easy to do. Really helpful to patients.</i>			
<i>Thought the course notes were really great to even help explain to patients. Research articles - awesome!</i>			
<i>I would recommend taking it to learn the value and benefit what can be achieved through using these therapies - great research and efficacy demonstrated.</i>			
What would you change about this course?			
<i>Nothing.</i>			
<i>Nothing.</i>			
<i>It was great! I would love to have more protocols offered (ex. "x condition responds well to xmany treatment at this dose"). Even success stories showed with protocols would be good. A step-by-step explanation (with equip) of insufflation would be helpful.</i>			
<i>More practical opportunity - be able to do the process a couple more times.</i>			
<i>More practise attempts would be better - 1 other person to help out and watch practise attempts. 2 UBI machines.</i>
