Why would you recommend/not recommend this course?

Great instruction. Clear format. Great learning style.

Recommend - great emergency medicine refresher & handy chart.

This is an extremely important course because it will make ND's more competent & responsible clinicians in the medical settings and will allow NDs to practice safer medicine.
Yes!

To learn info not taught anywhere else

Clear and concise. Chart is very helpful for retention.

Critical information taught in this course that is not covered thoroughly in naturopathic college. Quick reference chart is very useful. IV & acupuncture/manip practical seperated fairlu well.

I would recommend this course for IV therapists but not so much just for restricted activities such as acupuncture however, I did get clarification on crash cart wich is still relevant to general practice

What would you change about this course?

Nothing. Really enjoyed. More informative/practical than expected. Thanks!

Condense acupuncture/one day option further (notes/crash cart/total hours)

I would use larger tables for the available surface area or less people per table

I would have an acupunture/manip specific Emergency Kit. At times it was a bit confusing differentiating what was required or not for IV vs. non-IV docs.

More options a year to take it. Offer in Red Deer

Create a chart with pastel color - will make it easier to differentiate red from orange.

Organize course notes so theory for IV & acupuncture/manip is easily differentiated.

The format for only 1 day attendees - the whole course could be taught in one morning for this group.
