Why would you recommend/not recommend this course?	
Great for those practicing Ivs	Recommend
The course was helpful for emergency procedures going beyond CPR. The chart was very important and useful.	Recommend
Really liked the <u>chart</u> . I feel more prepared. Scenarios were helpful.	Recommend
Role playing was useful, scenarios seem excessive I understand the need to be over-prepared.	Recommend
o2 + vitals were relevant to my practice of non-iv	Recommend
The information and chart is valuable + applicable.	Recommend
For IV this course would be very helpful.	Recommend

What would you change about this course?	
Making it a separate course for Acupuncturists	
A smaller more specific course for non-IV practitioners	
A separate comprehensive course for Acupuncturists because a lot of information pertains just to IV therapy.	
More summarized / separate for restricted activities not pertaining to IV.	
Amount of reading from slides. Would be better if material was digested further i.e. diagnostic algorithms. More pathophysio to explain rationales.	
Shorter 1/2 day seperately for acupuncturists / non-iv.	
Shorter time frame more specific to scope (ex. Acupuncture vs. IV) or restricted act.	
For non-IV and acupuncture a short emergency first aid review would be good.
