23. Explanation of the chart was		18	6	0			
TOTALS		339	166	36	0		

	Yes	No
Did you feel confident using IV Therapies before the course?	16	8
Do you feel more confident using IV Therapies after the course?	23	1
Will you be using IV Therapies in the future?	24	0
Would you recommend this course to other ND's?	24	0
Have you used IV therapies in your practice prior to coming here?	20	4

	0-2 years	2-5 years	5+ years
If yes how long have you been using IV's in your practice?	6	4	9
How long have you been a licensed professional?	3	3	15

Why would you recommend/not recommend this course?

I have always enjoyed Dr. Prytula's courses and learned a lot.

Yes I would! Very important for any RN administering any kind of therapy or injections.

Every practitioner doing restrictive activities of IV's/Injections needs to take this course because its great practical role playing.

Good course, would recommend it bit its expensive so that is a factor especially if were retaking it every 4 years! I do feel much better equipped to handle an emergency.

The hands on nature of the course was a great way to learn, ask questions and to see how difficult it could be in an emergency situation if not organized.

Yes - it improved my confidence for patient safety.

Yes.

This is a great informatory (learning) course for a person wanting to do IV's.

Specific for NDs, thorough and concise.

Much more relevant to the actual kinds of problems we will see doing TV therapies, compared to anything ive done in the past!

Relevance, ease of access to emergency procedures

Informative, provides stats. I enjoyed the sharing of clinical experience and research especially.

Content was well organized and specific to ND's

I would recommend this course to NDs because this information increases a doctors comfort level with dealing with an emergency situation through role playing and getting

comfortable practicing situations rationally. It helps take some of the fear out of emergency situations. It's one thing to read this stuff its another thing to practice thinking on your feet.

Most relevant Emergency Course for ND's

Much better than ACLS / IV Therapy courses in BC!!

What would you change about this course?

Table of contents for this handbook would be really useful. Also make a different form of duotang.

For ease of finding data when you need it, it would be best to have all pages indexed, listing topics.

I would move the location of cities that these are held in.

Have a few demos of scenarios (live) and online videos of scenarios.

A specific course for acupuncture.

Change to 1-day recertification course when taking course multiple times

I would have liked to see some information about minor surgical therapies since I've been required to take it to do minor surgery in Alberta

More room for seating, tables crowded

Chart - maybe change the orange to a different color? As well as single sided (I put mine up on the wall) and would you be able to provide powerpoints?

More consolidation of material + role plays.

Have the IV basics and Emergency course offered together

Have participants from Emergency course showup early to have the "newbies" do lvs ont hem to get more practice - plus the NDs would get a boost before the course! :)

<i>A bit pricey for what was learned</i>			
Would you like to take further courses given by Michael A. Prytula ND?	Yes	Maybe	No
