Why would you recommend/not recommend this course?				
<i>Very knowledgeable instructor.</i>				
<i>Teaches to all learning styles, applicable, lots of clinical reference and good workable chart.</i>				
<i>Really liked the false arms to practice on.</i>				
<i>Goes over the key concepts you need to know at an efficient pace. Hands on learning is encouraged which is great. Though the exam does not have a lot of emphasis there are questions that we did not cover and would've been good to know.</i>				
<i>Good practical models to practice on.</i>				
<i>Good introduction for exposure to IV's</i>				
<i>Not too in depth which was good if you don't focus on cancer (i.e. pics and ports)</i>				
<i>Great info and presentation with essential info in a useful format.</i>				
<i>Good info, great tips and an awesome teacher.</i>				
<i>Dr. Prytula is passionate and has a huge amount of experience.</i>				
What would you change about this course?				
<i>Been able to practice more IV techniques on each other.</i>				
<i>Limited practice with expensive supplies.</i>				
<i>Perhaps increased price by \$10-\$20 to charge more for supplies felt as if there was a shortage of gloves and other things.</i>				
<i>Larger projector screen</i>				
<i>Better quality handouts in booklet</i>				
<i>Some way to increase the number of injections done under supervision</i>
