

ASCORBATE THERAPY CONSENT FORM

It is NaturoMedic™.com's intention to educate you sufficiently in regard to Ascorbate therapy so as to facilitate a fully informed and knowledgeable decision made freely by you.

Whether or not Ascorbates are "safe" or "effective" for a specific condition depends upon: (1) the degree of likelihood of injury from the use of the procedure when properly administered, (2) upon the prognosis for the condition if left untreated, (3) and upon your cooperation in the following dietary, metabolic nutrient recommendations and rest regimen which accompanies our procedure. It is believed in your case that Ascorbate therapy is proper under these criteria and you will quite probably improve your overall health from its use. However, you must understand no one can or does guarantee or warrant the results in any manner of any therapy. Further, because the use of IV Ascorbates is regarded as innovative, we cannot and do not offer this procedure to you except on the condition that you release us from any legal responsibility for harm resulting from its use in your case. Your signature on this agreement will constitute a full and final release of our legal responsibility resulting from the administration of Ascorbates in your case and/or any other medical treatment, which may be deemed necessary as a result thereof.

THEREFORE:

I have been advised of the following by NaturoMedic™.com:

- Ascorbate therapy has been approved by the Food and Drug Administration and Health and Welfare Canada for use as an IV supplement.
- Ascorbates have not been reported to be harmful or dangerous when used in the concentrations or dosages employed by NaturoMedic™.com.
- Ascorbates are being used increasingly by a minority of physicians for the treatment of **boosting the immune system.**
- Since a majority of doctors do not use it, insurance companies ordinarily do not pay for Ascorbate therapy.
- Also I realize that if I have cancer there have been reported cases of tumor hemorrhage and necrosis. These typically but very infrequently lead to death.
- Any IV, whether here at NaturoMedic.com or at a hospital, has the possibility of causing complications that may even include death.

The method of administration of Ascorbates, the purpose for its administration in my case and its potential for good as well as the potential for harmful side effects have been explained to me.

I have read and understand the above. I hereby place myself under the care of NaturoMedic™.com for Ascorbate therapy, and agree to release NaturoMedic™.com from all liability. This also signifies I have been given or asked for and received Ascorbate articles and/or other educational literature, which I have read carefully and understand the contents. I agree that Ascorbates is being administered to optimize my health and not to treat any specific diagnosis or condition. I also give my consent that all information gained from this treatment may be displayed, distributed, published and otherwise used for educational and teaching purposes as long as my identity remains anonymous.

I also acknowledge that NaturoMedic™.com has provided me with 72 (seventy-two) hours to review all materials and information imparted to me before making my decision on using this therapy.
