

# THE NATUROMEDIC EMERGENCY COURSE IS BACK

## Returning to Alberta After a Two-Year Hiatus

### ***THE COURSE ALBERTA NDs HAVE TRUSTED FOR OVER 20 YEARS***

When Dr. Michael Prytula created the NaturoMedic IV Emergency Medicine Course in the early 2000s, nothing like it existed.

The NaturoMedic Emergency Medicine Course was built specifically for naturopathic clinic IV practice. Every component has been updated to current evidence standards and includes real clinical scenarios, practical decision-making, and emergency situations that can occur in everyday naturopathic practice.

#### ***WHAT YOU'LL LEARN – AND DO***

This course is hands-on. You won't be watching slides for two days. The NaturoMedic course gives you the protocols, the hands-on repetition, and the clinical confidence that only comes from doing — not watching.

You'll be running scenarios, making decisions, and drilling skills until they become reflex.

- Recognition and rapid response to IV-related emergencies
- Anaphylaxis and severe allergic reaction management
- Cardiovascular and respiratory emergency protocols
- Vasovagal syncope and loss of consciousness response
- IV infiltration, embolism, and line complications

- Emergency medications: indications, dosing, and administration
- Documentation, liability, and post-emergency protocols
- Scenario-based practice with live supervised skill stations

#### ***THIS COURSE IS FOR NDs***

- who perform or plan to perform IV, ozone, chelation, prolo and other injectable therapies in your practice
- need to satisfy RA requirements with in-person, skills-based training
- want emergency training grounded in naturopathic clinical reality
- value learning from practitioners with direct clinical and emergency experience, not from a pre-recorded lecture.

#### ***COURSE DETAILS***

- Dates: September 19–20, 2026
- Time: 8:00 AM – 5:00 PM both days
- Location: Country Inn & Suites by Radisson, Calgary NE. 2481 39th Ave NE, Calgary
